

HAND HELD DRENCH HOSE – SINGLE NON-AERATED EYE & BODY WASH 1.5m HOSE

THE PRATT PS920 IS A PLUMBED, HAND-HELD EMERGENCY FLUSHING DEVICE DESIGNED FOR RAPID, TARGETED RINSING OF CONTAMINANTS FROM THE EYES, FACE OR BODY.

It is classified as supplementary emergency equipment under AS4775 and is intended for use alongside primary emergency eyewash or shower systems.

FEATURES:

- Single non-aerated spray head
- Trigger-operated activation with stay-open lock
- Integrated 2 LPM flow regulator
- 1.5m stainless steel braided hose
- 15mm BSP inlet connection
- Wall mounting bracket supplied
- Optional bench mounting bracket available
- Corrosion-resistant construction

APPLICATIONS:

- Laboratories
- Chemical handling areas
- Industrial facilities
- Workshops
- Maintenance areas
- Educational environments

SPECIFICATIONS:

Connection:	15mm BSP male
Hose Length:	1.5 metres
Flow Regulation:	Approx. 2 LPM (factory fitted regulator)
Spray Type:	Non-aerated direct stream
Installation Configuration:	Wall or bench mounted

ACCESSORIES:

Bench mounting bracket (optional)

COMPLIANCE:

- Classified as supplementary equipment under AS4775
- Intended for integration within systems designed to comply with AS4775 or ANSI Z358.1
- Not intended as a primary eyewash device

IMPORTANT INFORMATION:

- Designed for connection to plumbed water supply
- Performance is dependent on incoming water pressure and system capacity
- Refer to Installation, Operation & Maintenance Manual for full instructions
