

PRATT FORKLIFT CYLINDER STORAGE CAGES

1 DOOR | 2 SHELVES

PRATT Forklift Cylinder Storage Cages provide a secure and practical solution for the storage of LPG forklift cylinders in commercial, industrial and warehouse environments. Available in single and multi-level configurations, the range accommodates up to 16 forklift cylinders while promoting safe storage and good housekeeping practices.

FEATURES & BENEFITS:

- Heavy-duty intermediate shelf for two-level cylinder storage
- Allows segregation of full and empty cylinders where required
- Efficient use of storage space without increasing footprint
- Suitable for storage of LPG forklift cylinders in warehouse, distribution, manufacturing and logistics environments
- Heavy-duty steel construction
- Yellow powder coated finish for durability and visibility
- Welded steel mesh panels for ventilation and product visibility
- Solid steel roof and floor
- Secure lockable door design
- Raised support legs with pre-drilled mounting feet
- Strong magnetic door catches with padlock eye
- Forklift movable when empty for relocation purposes
- Available in flat-pack and assembled configurations
- Designed to encourage safe storage and good housekeeping practices
