

EMERGENCY SHOWER & EYEWASH SIGNS

PRATT Emergency Shower and Eyewash Signs are designed to clearly identify the location of emergency shower and eyewash equipment, enabling rapid response in the event of a chemical exposure or workplace incident.

In accordance with AS 4775, emergency equipment must be:

- Clearly identified with a highly visible sign
- Compliant with AS 1319 – Safety Signs for the Occupational Environment
- Positioned so the sign is visible throughout the area served
- Installed in a well-illuminated location

Effective signage is mandatory under the Australian Standard and critical in reducing response time during the first few seconds of an incident.

FEATURES:

- Complies with AS 1319 signage requirements
- Supports compliance with AS 4775
- High-visibility green/white pictogram design
- Available in multiple sizes and materials
- Suitable for wall or stanchion mounting
- Compatible with PRATT stanchion mounting brackets

SIGNAGE OPTIONS:

PRATT signage is available in two material types:

- Metal (M) – Colorbond steel for durability
- Poly (P) – Polypropylene for lightweight, corrosion-resistant applications

ALL SIGNS INCLUDE:

- Rounded corners
- Pre-drilled mounting holes
- Suitable for wall or equipment mounting
